PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Authors should expand on the discussion section about other case series on hemolysis in Wilson disease. Walshe et al has a good case series of 22 patients with hemolysis in Wilson disease.</p> <p>Authors mention in the discussion section that patient did not present with fulminant hepatitis; however based on the labs patient had significant abnormalities in LFTs and bilirubin; so I believe the patient did present in fulminant hepatitis.</p> <p>Authors say the uniqueness in their case is that he had persistent hemolysis. What was the copper/ceruloplasmin level over the 2 yrs. Could it be because of persistent elevated ceruloplasmin that the patient had a low level hemolysis.</p> <p>Was hemoglobinemia/hemoglobinuria checked?</p> <p>Images need to be clearer and better labelled.</p> <p>improve the discussion section and could be published.</p>	
Minor REVISION comments	<p>-a few spelling mistake- Persistent is spelt persistant</p> <p>-USG needs to be first labelled as ultrasound and then the acronym should be used.</p> <p>-In the introduction the last sentence is incomplete.</p> <p>- what is the gene Xpert in pleural fluid-needs to be explained.</p>	
Optional/General comments
