Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The article subject is actual for an education system. The research is interesting and useful to educational practice.</p> <p>The research general of scientific problem has not been formulated. General scientific hypothesis of research has not been formulated. General scientific purpose of the research is not formulated. The statistical processing of the data is not clear (Descriptive statistics !!).</p> <p>The theoretical structure basis of the study are well explained and funded, but there are contemporary references about the theory that must be revised and included, the same for the discussion and conclusions. The methodological design of the study is right, but It is necessary to comment the inclusion and exclusion criteria for participants to get no interference of strange variables in the experiment. Results are clearly showed and they are pertinent.</p> <p>There was no attempt to critically or reflexively consider limitations in the research or to make policy or pedagogic recommendations from this work</p> <p>The latest APA edition must be strictly maintained.</p>	
Minor REVISION comments	<p>There is no mention of any ethical protocols having been observed in relation to the recruitment, consenting and right to withdraw of the participants</p>	
Optional/General comments	<p>My best wishes to the author to rectify his work a little for the publication.</p>	

PART 2:
