Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The manuscript titled : Semen and spermatozoa characteristics in alcohol users and non-users compares the characteristics of semen and spermatozoa in alcohol users and non-users of alcohol.</p> <p>In order for the work to be published in my opinion it is necessary that the authors provide all this information:</p> <p>It is necessary to cite the number of the ethics committee that permitted this trial.</p> <p>The age range is very wide so as not to exclude other factors affecting semen quality.</p> <p>What are the selection criteria? Do the subjects live in polluted areas? Human semen is now considered an early sentinel of an organism's health status. Human semen is very susceptible to environmental pollutants.</p> <p>I recommend the authors to read and quote the following work: Molecular Alterations in Spermatozoa of a Family Case Living in the Land of Fires. A First Look at Possible Transgenerational Effects of Pollutants DOI: 10.3390/ijms21186710 Discovery of the Involvement in DNA Oxidative Damage of Human Sperm Nuclear Basic Proteins of Healthy Young Men Living in Polluted Areas DOI: 10.3390/ijms21124198</p> <p>How much alcohol do they consume per day? The work is too meager. Pictures are also needed. The bibliography needs to be expanded.</p> <p>It is necessary to know well the selection criteria of these recruited subjects otherwise it is not possible to attribute these alterations in semen to alcohol.</p>	
Minor REVISION comments	Change ml in mL	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
