PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1. Majority of GDM are diagnosed at eight months in this study, and this is one indicator of poor GDM screening as we can make no difference with MNT and Oral OHA use. Good facilities diagnose GDM in early Weeks 12-16 of Pregnancy.</p> <p>2. There is no question on the results of this study; how we can improve these poor outcomes may be addressed.</p> <p>3. Overall it's a Good study, It would be good if you mentioned which criteria for diagnosis of GDM used; kindly highlights if Govt of India Guidelines for Diagnosis of GDM (DIPSI Single Test Procedure for diagnosis of GDM is used?)</p> <p>4. Spelling check is required.</p> <p>. Congratulations for Good study.</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
