PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>"Edoema" should be "oedema." There are many typographical errors that need a space between words.</p> <p>As references are cited at the end of each chapter, I would recommend that the references be moved at the title of each chapter, like "Introduction [1,2]."</p>	
Minor REVISION comments	<p>I would recommend "Criteria of Budapest" be moved after the first paragraph of "Evaluation."</p> <p>It would be more valuable for physicians if you mention reported side-effects of glucocorticoids and bisphosphonates for the treatment of CRPS which you cited in the manuscript.</p>	
Optional/General comments	<p>The manuscript reviewed concisely recent concept changes of and advances of complex regional pain syndrome (CRPS). The manuscript covered many arenas of CRPS adequately.</p>
