

## Review Form 1.6

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_JPRI_77110
Title of the Manuscript:	A CROSS SECTION ASSESSMENT STUDY ON THE AWARENESS OF COVID-19 DURING THE ONSET OF THE PANDEMIC AMONG THE URBAN POPULATION OF THE SAUDI ARABIA
Type of the Article	Original Research Article

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>)

### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p><b>Abstract:</b> The abstract of this research has not described the results of the research carried out, so that we as readers have not yet received a detailed description of the research</p> <p><b>Introduction :</b> In the introduction, the author should convey about the background of the research, gaps or things that need to be known about the research subject. The researcher should write about the time of the study, the population or sample, the method of research, the analysis is included in the method, not in the introduction</p> <p><b>Methodology:</b> In the methodology, it is necessary to explain the basis for taking a sample of 1000 people. How is the validation of the questionnaire, the questionnaire used using a standardized questionnaire or a questionnaire made by the researcher?</p> <p><b>Result and discussion :</b> research results do not need to be repeated in tabular form, in the form of diagrams and narratives, it will be easier to convey with tables or diagrams according to what you want to explain and narration only to emphasize what is important. Mobility, stay at home and lockdown are important parts of preventing the spread of covid-19, how about this research? because there is no Questioner or explanation about it. Preferably in the discussion it is necessary to compare the results of this study with other studies, whether the Arab population is more aware or not when compared to residents of other countries, and see what makes it different from other studies.</p> <p><b>Conclusion:</b> The conclusion should be more concise and there should be no unnecessary repetition.</p>	
<b>Minor</b> REVISION comments	This research is interesting but needs a more detailed review	
<b>Optional/General</b> comments	Why do researchers not link the incidence of covid-19 in Arab countries, meaning that researchers can see whether the level of knowledge, attitudes affect the number of cases?
