PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| Compulsory REVISION comments | <p>In discussion it should be clarified that iron is unlikely to rise with a single exercise since hepcidin increases the absorption of iron that depends on the intake; in this case, if the inflammatory response to exercise was emitted, ferritin should be measured</p> <p>Also specify that the type of exercise was not uniform for everyone, in a soccer game not everyone necessarily performs strenuous exercise. Was the amount of exercise performed by each player measured?</p> | |
| Minor REVISION comments | | |
| Optional/General comments | | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|--|---|
| Are there ethical issues in this manuscript? | <i>(If yes, Kindly please write down the ethical issues here in details)</i> | |
