### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>It needs a justification for the claim of random sampling method used, the statistical test used is not suitable since the assumption required by that method is obviously not satisfied by the data. A larger sample size is required, otherwise, avoid using an inferential method, and just use a descriptive analysis. Moreover, please check on the "dependent-independent" assignment of the measurements, as: 1) it seems to be the other way around, and 2) the method used actually does not need to be the "dependence method".</p> <p>There are several strong claims that need supporting evidence, please put appropriate references; and should follow a standard (chosen template) of citation and referencing style.</p>	
<b>Minor</b> REVISION comments	Need to work on the language use, such as grammar, punctuations, a proper sentence, and a proper paragraph. Please also check and fix the typos.	
<b>Optional/General</b> comments		

### **PART 2:**
