### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	I reviewed the paper entitled "A review on therapeutic application of CRISPR/Cas9 for HIV". The authors have summarized work of previously published articles. In my opinion, authors have just written commentary of the results of the other researchers in spite of analysis of the research. The authors should make more efforts to correlate the available methods and their limitations. My major comment for this MS is to demonstrate the mechanism of action of CRISPR/ Cas in curing of the particular disease. MS is not cited Appropriately at many places and just 9 references are very less for a review article on this important topic. Authors should made more efforts to shape their MS and cite appropriate references.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
