

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_77669
Title of the Manuscript:	REVIEW ON POLYMERIC NANOPARTICLES FOR IMPROVE BIOAVAILIBTY OF LESS WATER SOLUBLE DRUG
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In general revise the English writing.	
Minor REVISION comments	In the section Polymer based Nanoparticles it should be mentioned in advance the different types of Polymeric materials used as well as other ones with potential applications if it is applicable. Add references	
Optional/General comments	<p>The manuscript is well organized; however it could be added more discussion about the references added exploiting by this manner more the information provided. In similar manner it is suggested to incorporate more text that it could permit to the reader follow your insides and incorporation of ideas. And please check the image quality used.</p> <p>Moreover, please consider to add more redaction along the different sections incorporating more details joining the different sections developed. By this manner, the reader could follow the direction of your message in the theme or topics afforded.</p> <p>The mention of the Figures is missing in the text. It should be added in the context of your discussion and needs.</p> <p>The Conclusions could be improved highlighting polymeric materials added, and methods used. In addition to the size factor it is suggested to revise or mention the effect of chemical surfaces applied on Nanoparticles to increase Bioavailability of drugs depending of the objective.</p> <p>A final comment or observation is that the line or direction of the theme and topics developed are very interesting with high impact; however it should be added more discussion incorporating text by you as author in the different sections.</p>	

Review Form 1.6

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
