Manuscript Number:	Ms_JPRI_77748
Title of the Manuscript:	Effective treatment of a post-renal transplantation patient with early recurrent focal segmental glomerulosclerosis and concomitant hemolytic uremic syndrome, a case report
Type of the Article	Case study

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>

### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The manuscript is well written, treats an actual problem well-organized, easy to read. In case history the author is describing therapy of patient without mentioning the doses of methylprednisolone (pulse-therapy), Rituximab, Eculizumab as well. It should be added.	
<b>Minor</b> REVISION comments	The article will be more interesting to read if it has some tables (with laboratory findings) and grafts, biopsy pictures.	
<b>Optional/General</b> comments	There are some mistakes in text: Introduction (p.2) – E.Coli should be written Missing space between words (case history, second paragraf), between bolts (p.3, paragraph 3).	

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
