

## Review Form 1.6

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_JPRI_77759
Title of the Manuscript:	Antibiotic Resistance patterns among bacteria isolated from rural and urban wastewaters of West Bengal, India
Type of the Article	

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>)

Review Form 1.6

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p><b>Antibiotic Resistance patterns among bacteria isolated from rural and urban wastewaters of West Bengal, India</b></p> <p>This manuscript described comparing <b>antibiotic resistance patterns among bacteria isolated from rural and urban wastewaters</b>. I recommend that the authors to properly perform the following corrections/clarifications.</p> <p>1. In section of physicochemical parameters The authors wrote he will determine the percent of total organic carbon, ammonia, nitrogen but these parameters are not presented in the manuscript.</p> <p>2. Author wrote COD, heavy metals and phosphorus are higher than permissible limits and didn't mention to the permissible limits in the manuscript.</p> <p>3 In microbiological examination part The author wrote that the isolated bacteria were presumptively identified but the test doesn't present in the manuscript.</p> <p>4. In antibiotic resistance patterns The results should be designed in table it includes the concentration of antibiotics and the diameter of inhibition zone of bacteria.</p>	
<b>Minor</b> REVISION comments	<p>1. There are few English errors and format problems (some are identified in the attached file). The English presentation should be improved to enhance the readability of this manuscript.</p> <p>2. Please insert the page number and page lines.</p> <p>3. The format of the Figure is not good also the caption of figure 1a and 1b are shown in the same figure don't separate it please, see the below Figure</p>	

**Fig. 5.** SEM images of UiO-66(Zr)-green (a) and 10SA/UiO-66(Zr) (b).

4. In section of physicochemical parameters

The authors wrote he will determine the percent of total organic carbon, ammonia, nitrogen but these parameters are not presented in the manuscript.

5. Author wrote COD, heavy metals and phosphorus are higher than permissible limits and didn't mention to the permissible limits in the manuscript.

6. In microbiological examination part

The author wrote that the isolated bacteria were presumptively identified but the test doesn't present in the manuscript.

7. In antibiotic resistance patterns

The results should be designed in table it includes the concentration of antibiotics and the diameter of inhibition zone of bacteria.

8. in the manuscript the author wrote supplementary table A and table B, please, the supplementary file is separated file and mentioned the data in it as Figure 1S or Table 1S in the main text and so on.

9. **Table 1. Identified isolates with varying antibiotic resistance patterns, please, write the caption of table and figures like the following example Table 1.** Identified isolates with varying antibiotic resistance patterns

Optional/General comments

Review Form 1.6

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

**Reviewer Details:**
