PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	No	
Minor REVISION comments	I consider this article to be an excellent and well-conducted research work, relevant and up-to-date. The author intended to investigate the clastogenic effects of the plant Lippia <i>Nodiflora</i> on prostate cancer cells. The results are encouraging and offer new hope for the treatment of prostate cancer. However, I would like to make some suggestions. <ul style="list-style-type: none">- 1. standardizing the writing of the plant name throughout the text- 2. elimination of etc.- 3. standardization of measurements, using a capital letter for the liter (i.e) mL, dL- 4. adjusting the commas where necessary- 5. Review the citation style	
Optional/General comments	.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
