PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|--|
| Compulsory REVISION comments | The manuscript could be interest for the readers. However, it is necessary to provide more information about previous articles about this pathology. The actual format seems to be like a book chapter, without a review of the literature. It is necessary to insert the references after the sentences, especially on the situations about previous data. In addition, it is rare to talk about 2 different studies in the genetic factor section providing only 1 reference. It seems than the author did not realize an exhaustive review of the literature. Some sections of the data could be expressed on figures or tables. One example could be the treatment or the clinical-diagnosis approach about this pathology. | |
| Minor REVISION comments | | |
| Optional/General comments | | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
