PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p><i>C. albicans</i> is a fungus, why antibiotic is given? Methodology is confusing. Explain the steps more clearly</p> <p>What was the positive control for the fungus? Mention the limitations of the study and translational value. Write a note on future perspectives of this study Extensive language corrections has to be done References should be cited relevantly. Discussion: This is partially due to the increasing longevity of the population and the increases in tooth retention within this age group (47)- poorly written</p>	
Minor REVISION comments	<p>SH- sulfhydryl group. Expand all the abbr. for the first time and then use the abbr in the manuscript</p>	
Optional/General comments		

Review Form 1.6
