PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	In general, the research is good, I have only 2 comments: 1) The authors mentioned a huge number of references and concentrated most of these references on two sites, The first site on the 3rd page before the aim of the study, it was mentioned 19 references. The second site, in conclusion, mentioned 15 references, although usually, the references don't mention in the conclusion part of any research. So half of the references of this study were mentioned in the aim and conclusion 2) In the 1st raw in the result part, the word (Red) was written without R (ed).	
Optional/General comments	I suggest reviewing the reference again, use a uniform style, reducing or reorganizing the distribution of the references in the manuscript.	

PART 2:
