PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Authors should revise order of the various parts of their review paper. Introduction, Methods, Results, Discussion. Authors mention in the last paragraph of their abstract (and on page 4) factors with effects on 'blood sugar'? This needs more info and explanation as it is not clear what it meant. The review is very broad and the info content low, not new. The English language needs a major editing. I started this (see attachment) but authors need to finalize and adapt.	
Minor REVISION comments	Authors should use the correct nomenclature: <i>Spermacoce verticillate</i> L. Fig.1 needs revision: the source mentioned is not in the Reference list, and the blue pie on Fabacea mentions 12 and 26%? Throughout the text and ref.list authors should adapt upper and lower case lettering.	
Optional/General comments		

PART 2:
