PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I am satisfied in general with the presentation of the case study highlighting the effect of exercise in post Hydro Pneumo Thorax recovery. I don't recommend any major revision.	
Minor REVISION comments	The author has given some references where Pulmonary Function Test data was mentioned. It would have been nice if similar data was present in this case study for before and after exercise program.	
Optional/General comments	The chronology of the case was presented nicely. But, there could have been mention of presence or absence of any chronic illness or co-morbidity like cardiac disease or diabetes, which may influence disease severity and overall outcome.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
