

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_78034
Title of the Manuscript:	Selective SGLT2 Inhibitor's Estimation and Validation from Galenical Form by RP-HPLC Method
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In this article, the authors discuss the development of an RP-HPLC analytical method for the quantification of the selective SGLT 2 inhibitor remogliflozin. It is an important and interesting work, however, I have some considerations to improve clarity and quality: - There are some problems in language and spelling. A throughout checking is recommended. - The chemical structure of remogliflozin should be included in the Introduction section. - The Discussion section is very superficial and needs to be improved. Previous works in the literature should be mentioned and discussed. - Many of the references used are old. Recent papers on the subject should be added if possible.	
Minor REVISION comments	Described above.	
Optional/General comments	Described above.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
