PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Dear Editor,</p> <p>The manuscript sent for review is a concise presentation of a case report regarding lymphatic filariasis with renal and anasarca manifestations. The sections of the manuscript are very well presented. In the Introduction section, the authors briefly presented data on the prevalence of filariasis in India and the lack of reports of kidney damage. Case report is well presented, both clinically, by specifying haematological and biochemical constants and paraclinical by specifying the results of ultrasonography and renal biopsy. The discussions are pertinent and make comparative reference to other reports of filariasis with different locations. Overall, case report is very relevant for renal manifestations of filariasis and opens a new perspective in the differential diagnosis of renal impairment.</p>	
Minor REVISION comments		
Optional/General comments
