<b>Minor</b> REVISION comments	<p>English</p> <ol style="list-style-type: none"> <li>1. Acronyms...should be in long form when first used with acronym in brackets</li> <li>2. "h/o"...correct this case notes style.</li> <li>3. The patient instead of patient</li> <li>4. Native English speaker for choice of some words</li> <li>5. We were not told if Doppler venous ultrasound of legs were done; any clinic evidence of deep venous thrombosis? on the second admission.</li> </ol>	
<b>Optional/General</b> comments	<p>The message is not original, but the case is important as it adds to the literature on post discharge venous Thromboembolism in Covid 19 which itself is evolving as the pandemic continues. The subject has the potential to change clinical practice when the dust settles.</p>
