Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>In this paper the Authors analyzed the modelling and Forecasting of COVID-19 New Cases in the Top 10 Infected African Countries. A comprehensive and extensive literature review of the NCBI database PubMed was also carried out. The article was well conducted and it is interesting in its fields. It is a well-structured paper, written in good English and the References are up dated.</p> <p>Minor issues:</p> <p>The during COVID-19 pandemic, the clinical evaluation of patients is deeply changed. The use of telemedicine and remote counselling, in fact, has gained great importance during covid 19 pandemic also in surgical fileds. In the "discussion" section I suggest to better analyze this topic. Therefore, the following paper should be considered:</p> <p>"Gambardella C, Pagliuca R, Pomilla G, Gambardella A. COVID-19 risk contagion: Organization and procedures in a South Italy geriatric oncology ward. J Geriatr Oncol. 2020 May 22:S1879-4068(20)30237-X. doi: 10.1016/j.jgo.2020.05.008."</p> <p>"Tolone S, Gambardella C, Brusciano L, Del Genio G, Lucido FS, Docimo L. Telephonic triage before surgical ward admission and telemedicine during COVID-19 outbreak in Italy. Effective and easy procedures to reduce in-hospital positivity. Int J Surg. 2020;78:123-125. doi:10.1016/j.ijso.2020.04.060"</p>	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
