PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article is mostly well-written and the figures well developed. In my view the research idea is of great interest and can be a candidate for publication in Journal of Pharmaceutical Research International. However I suggest the authors define the acronyms (e.g., ORIF) separately in the abstract and introduction before using them in other sections of the manuscript. In addition, I propose that the manuscript is proofread by a native English speaker or Editing service. So please make sure there are no English errors.	
Minor REVISION comments		
Optional/General comments
