PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	There is a lot of grammar issues and missing words in the manuscript (please see comments in the document). I strongly recommend major revision and serious English correction. In addition, the figures are not informative and lack valuable legends. Furthermore, there is little information about the surgical technique, the potential complications, the long-term results and the controversies found in the literature. Major revision of the manuscript is required.	
Minor REVISION comments		
Optional/General comments
