PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Introduction need to be short and precise and should focus mainly on the gap and rational of the study Methodology part is very vague and need to be elaborated and precise. Why ANOVA was applied. How sports performance was evaluated In table 1 , the descriptive analysis for physical, physiological variables are missing In Table-2 except for Weight Issues Variable, Levene's test was significant which means all the rest three variables violate the assumption of equality of variance. It has to be resolve Discus the finding according to the results of the study	
Minor REVISION comments		
Optional/General comments	Must be revised as per the format and also check for the grammer	

PART 2:
