PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. This work has the aim of developing and characterization in situ nanogel based topical sprays for the treatment of psoriasis, and the author has prepared chemically cross-linked gels by using hyaluronic acid and polyvinyl alcohol. However, I think that the author should describe the characterization of nanogel by using hyaluronic acid and polyvinyl alcohol as cross-linked to correspond to the objective of this work.2. In most cases, the author does not write about the procedure or the experiment that was repeated in the results section, but rather on the data, graph, or table.3. By referring to each figure or table, the author should analyze or describe the data in the results shown in Fig. 1-8 and, of course, all the tables.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
