PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1-In the abstract section, the introduction and objectives should be merged and summarized. The importance and main purpose of the study should be stated in this section.</p> <p>2-Keywords should be written in mesh.</p> <p>3-Correct the title of the article. Please write the words of the intervention study in the title of the article.</p> <p>4-In the working method, how to select students and the number of students who enter the intervention study should be mentioned.</p> <p>5-Please compare the experimental and control groups in terms of statistical and significant differences and write the result of the study.(Write P. Valio) .</p> <p>6-The article should be arranged according to the format of the journal articles.</p> <p>7- The working method should be reviewed. The way of writing it should be corrected in the article. The method of summarizing the work and pointing out its most important points.</p> <p>8- After writing down the steps and methods of work, the results should be mentioned in the relevant section. Separate the results from the discussion section.</p> <p>9- It is important to address the results and discussion in two separate sections.</p> <p>10-The results should be presented in the form of tables or graphs. Why does the article lack graphs and tables?!</p> <p>11- By searching for more references, the results of other studies in the discussion section of the article should be compared and discussed with the results of this study.</p> <p>12- Mention all the results of the intervention on the students.</p> <p>The number of cases of absenteeism, diarrhea and respiratory infections in both experimental and control groups should be mentioned.</p>	
Minor REVISION comments	<p>Refer to the journal essay writing guide and add Conflict of Interest and Appreciation sections.</p> <p>Please write the final result carefully at the end.</p> <p>Has the bias been seen?</p>	
Optional/General comments	<p>Was the hand washing training sticker distributed at the same time as the school intervention and supervision? It is better to mention this issue in the study discussion by providing suggestions.</p>
