### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<p>The authors' idea of creating a device to help dentists create accurate dentures is a good one.</p> <p>The idea of creating an articulator needs to be better explained. Opening and closing movements alone are not enough to reproduce movements in an articulator.</p> <p>A more thorough review of the literature should be made and scientific data should be based on why the Articulator was designed in this way.</p> <p>As a result, all explanations for the order of the teeth should be visualized in stages with photos. To be visible the benefit of creating this type of Article.</p> <p>In a discussion to add a comparison with similar or other devices and then to highlight the benefits of creating this species.</p> <p>Let the authors explain why the device is an articulator and not a more modern type of occlude. This is important and useful for clinical practice.</p> <p>The bibliography is insufficient.</p> <p>If the authors rework their article, it can be very useful for practice.</p>	
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
