

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_78421
Title of the Manuscript:	Gestational Anaemia and its Associated Factors in Normal Pregnant Women
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Introduction: To show some more references regarding the prevalence of thalassemia and hemoglobinopathies among the general population Methodology: Thalassemia and hemoglobinopathy traits should be excluded by positive screening tests, NESTROFT and/or DCIP Discussion: Some more reference(s) to be shown for how much less frequent the thalassemia trait and hemoglobinopathies carriers as a cause of anemia in general population or in pregnant mothers	
Optional/General comments	NESTROFT and DCIP are highly sensitive tests for the detection of thalassemia traits (both alpha and beta) and hemoglobinopathies carrier states. Both tests are easy to perform and economical.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
