

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_78651
Title of the Manuscript:	Isolation and characterization of Quercetin from Bambusa arundinacea
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	A subclass of flavonoids called flavonols has received Flavonoids, natural antioxidants derived from plants and commonly found in foods such as fruits and vegetables, with the ability to scavenge free radicals. Quercetin has received considerable attention due to its overwhelming presence in foods. Quercetin has also been found. Further, the isolation procedure was carried out and analyzed using TLC, FTIR and UV, 1 H NMR, Mn Bambusa arundinacea. The plant was obtained and authorized and X-ray structural analysis performed. The results obtained for the above parameters showed similarity with standard quercetin.	
Minor REVISION comments	It was concluded that quercetin is present from Bambusa arundinacea.	
Optional/General comments	The work is of great medical interest and can be published in the open press.
