

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_78713
Title of the Manuscript:	Causes and Management of Neck Pain in Primary Care
Type of the Article	Review

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>You reviewed causes and treatments of neck pain. The manuscript is concise and valuable. As the manuscript consist of only sentences, addition of figures showing the odds ratios of different treatments and risk factors of neck pain would make the manuscript more understandable for readers.</p> <p>There are quite a few typographical errors missing a space between words. They can be avoided if the co-authors read through the manuscript before submission.</p> <p>Specific comments: There are two expression: neck pain and neck discomfort. Your title says "Causes and Management of "neck pain" in primary care." Your abstract began with the word "neck discomfort." Are there clear difference between "neck pain" and "neck discomfort." If you clearly differentiate them, your definitions of "neck pain" and "neck discomfort" should be stated.</p> <p>Just before "Risk Factors" there is a description of "The hospital anxiety and... pain inventory." I cannot understand what this means.</p>	
Minor REVISION comments	<p>Risk Factors, second paragraph, 6 and 3 lines from the bottom: I cannot understand "3nor>3 h."</p> <p>Treatments, first paragraph, line 2 from the bottom. I cannot understand "low-level medicines."</p>	
Optional/General comments
