

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_78739
Title of the Manuscript:	A RARE FINDING OF ABUNDANT CRYSTALS IN THYROID FNAC A SHORT COMMUNICATION
Type of the Article	Short communication

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journalpri.com/index.php/JPRI/editorial-policy>

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The references do not appear in the text. That is hardly according to the journal's guidelines. I find it difficult to see what statements are referred to. At the beginning of the introduction, the text say that the thyroid anatomy was "invented". If anyone, then Gos might have done that. You probably mean described. Wrong spelling: isthmus You state that an elevated calcitonin is associated with parathyroid cyst. Calcitonin originates in the c-cells of the thyroid. Where is this statement from?	
Minor REVISION comments	There are scattered linguistic errors.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
