PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1) In the introduction part, the sentence mentioned in last line of the first paragraph and first line of the second paragraph can be written more clearly and precisely.2) Grammatical errors need to be corrected in the article. In the last line of the last paragraph of introduction part, sentence needs correction.3) In the result & discussion, one sentence in the last paragraph refers to reference no. 13 which was not mentioned in the reference section. Kindly verify the exact reference of the given sentence.4) The author should follow the standard reference pattern as per the journals norms in the reference section.	
Minor REVISION comments	<ol style="list-style-type: none">1) In the abstract part, in aim and methodology the name of the place where the study was performed is represented in two different patterns. It will be more acceptable if it is written in one pattern.2) In the introduction part where the details of the drug 'dorzolamide' is mentioned, some additional details like chemical structure, melting point, generally prescribed dose etc. can be added to make the article more informative.3) In the result & discussion part, along with the demographic datas, some proofs can be attached to justify the proposed study.4) In the result & discussion, the statistical datas that were mentioned in the article can be presented through some graphical or pie chart diagram to make the study more acceptable or eye catchy.5) In the conclusion section, some other names of ophthalmic drugs that are useful in lowering the intraocular pressure used in that region can be mentioned so that one comparative statement can be made with the proposed drug.	
Optional/General comments	Some minor revisions are there which need to be corrected by the author of the given article. Otherwise the overall article was presented in a very nice way.
