Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, corrects the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>The Author is talking about lockdown Impact :</p> <ul style="list-style-type: none"> • Adolescents in COVID period may experience mental distress and psychiatric problems. • COVID-19 has brought about a sense of fear and anxiety around the world. • This study also intends to look at whether gender, grade in class , single child status, online learning participation, parents' involvement in COVID-19 related work, and parents being quarantined or infected because of the disease would demonstrate clinically significant differences in anxiety and depression <p>As I am seeing here 3 major key words have been used: 5 Colored RED; you must be more specific because a normal person will not understand the medical or health statement's meaning of these technical words, so to have a trustful and a clear opinion you have to use a simple sentence combinations with words easy to understand, away from the medical technical clarifying the real meaning of COVID-19 IMPACT, and based on the answers you make the diagnostics and put down your statistic.</p> <p>In This Manuscript the Author mentioned that: All those who were willing to participate were included in the study. Those who were not willing and those who had language barrier in answering the English version of the questionnaire were excluded from the study.”</p> <p>The Author should be global no exclusion because of the Language barrier to have a trustful statistic results. A platform in different languages should be placed in collecting the answers and the translation can be made by Google. As it is a Global Pandemic the Questionnaire should be Global.</p> <p>1- A separate statistic of female and male asked should be provided in order to get the real average of the approximate number with YES -NO- No OPINION and an intermediate option must be put in the calculation board, also the category of adolescents and children, the location and the ages. In fact in my opinion all these points are essential to set down a statistic detailed board on COVID-19 IMPACT.</p>	
<u>Minor</u> REVISION comments	<p>Few typing mistakes in the Manuscript: to be reviewed.</p>	
<u>Optional/General</u> comments	<p>The Author can include a statistic from a Lockdown positive side Impact on mental health.</p> <ul style="list-style-type: none"> • Online class: makes a routine change for the adolescent to experience a

	<p>new way of study life. the students will have the chance to count on their own efforts to study, no instructors or educators are behind . I found it a great challenge to put more sense of responsibility on the students to make efforts on studying.</p> <ul style="list-style-type: none">• Work from home: Gave a chance to those who are jobless to work, as we all know a lot of Online Marketing firms are recruiting online agents to promote for them. This also, got a positive impact and many are enjoying study and work at the same time.
