PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>You can't reference works only because they are yours. Some references don't have any relation with the study.</p> <p>In general the paper is well written and 120 students is not a terrible number for a psychological study (more should be better). More details about the technical aspects are needed. A bad quality connection can be a cause of stress, for example. It will also be interesting to know the type of subjects they study and if there are differences in the results (technical studies create less stress). We need to see the 15 questions. The answers of the students should also be provided, maybe as a link.</p>	
Minor REVISION comments	It needs a format and English revision. I detected several small errors.	
Optional/General comments
