

## Review Form 1.6

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_JPRI_78974
Title of the Manuscript:	NOVEL UV SPECTROPHOTOMETER METHODS FOR QUANTITATIVE ESTIMATION OF EMPAGLIFLOZIN (EMPA) AND LINAGLIPTIN (LINA) USING MIXED HYDROTROPY SOLUBILIZATION
Type of the Article	

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	As both the drugs are less water soluble why you are going to increase aqueous solubility? If both the drugs are less water soluble they absorbed more from GIT, as already there are methods for estimation of serum concentration estimation by HPLC then by using spectrophotometer no need to study,	
<b>Minor</b> REVISION comments	Using aqueous solubility enhancing its not better option for estimation of concentration by spectrophotometer.	
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
