

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_78979
Title of the Manuscript:	Osmotic Activity of Drugs is an Important Factor of Their Local Action at the Injection Site: What We Don't Use to Prevent Post-Injection Abscesses
Type of the Article	Short communication

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	None.	
Minor REVISION comments	Line 28 after ref 1 in the range of 280 -300 mosmol/l of water and an physiological alkaline ... Replace "an" with "a".	
Optional/General comments	Nice idea, it would even have another benefit to patients, as adjusting the osmolarity of the injected drug to remove hypertonicity and hyper acidity or alkalinity would eventually reduce pain from drugs during injection.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
