

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_78979
Title of the Manuscript:	Osmotic Activity of Drugs is an Important Factor of Their Local Action at the Injection Site: What We Don't Use to Prevent Post-Injection Abscesses
Type of the Article	Short communication

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journalpri.com/index.php/JPRI/editorial-policy>

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. They have not mentioned the route of injection like subcutaneous/ intramuscular or intravenous.2. Infusion of fluids and one time injection of drugs are two different things and they need to be clear that what they are talking about (specially when giving reference of 0.9% saline and dextrose infusion).	
Minor REVISION comments	References are inadequate to support the comments.	
Optional/General comments	There are many causes of post injection abscess like technique and site of injection apart from only asepsis. These causes can not be ruled out. Osmolality can be proposed as one of the causes but needs to be supported from some test or investigation or some other method.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
