### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p><b>Abstract:</b> Introduction section should be deleted according to the author guideline. Study design should be added according to the author guideline. <b>Methods:</b> who was the target sample? <b>Results:</b> which part of the study was statistically significant? Conclusion is not clear. Keywords should be revised according to the MeSH library.</p> <p><b>Introduction:</b> The importance and the influence of COVID pandemic on surgical procedures are not clear and mentioned.</p> <p><b>Materials and Methods:</b> Write the number in letters at the beginning of the sentence. The pros and cons of the study should be discussed in the discussion section. How were the reliability and validity of the questionnaire assessed?</p> <p><b>Results:</b> The headings of the figures should be written in a separate line, not in the picture. Descriptions of the figures (colors and etc.) should be added in the headings.</p> <p><b>Discussion:</b> It not clear that these signs and symptoms were related to the COVID pandemic. Is there any other study in your department that investigated these problems following implant surgery before the pandemic? I think the discussion part should be totally revised.</p> <p><b>Reference:</b> Reference style should be revised.</p>	
<b>Minor</b> REVISION comments
