PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments The authors state that "During the study period between January 2018 to June 2018, 173 patients received domperidone".	<p>This statement does not give us an idea about the total no of prescriptions during the study period. Such an analysis would give us an idea about the percentage of prescriptions for the drug domperidone. Similarly a comparison of the demographic characteristics of those prescribed domeperiodne vs the rest would present a clear picture about the prescription pattern.</p> <p>Domperidone is also used for controlling vomiting associated with cancer chemotherapy. In the article submitted no attempt has been made to ascertain the use of domperidone for this indication.</p>	
Minor REVISION comments Language	Improve the language of presentation and let it be uniform throughout the manuscript.	
Optional/General comments References	Format should be uniform. For example issue numbers have been mentioned in some references while missing in the rest. Any electronic reference quoted should include the date on which the site was accessed.
