PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">- In the final paragraph of the section entitled: 2.Case report, the author did not mention whether he followed up the case or not. He mentioned the nerve block procedure only without referring to the following up issue which is very important to the patient case considering the future interventions and to know whether the procedure was beneficial or not.- In the first paragraph of the abstract section, the author mentioned that the nerve block procedure has a role in symptomatic and functional improvement but he did not mention this improvement in later sections especially the functional one.	
Minor REVISION comments	<ul style="list-style-type: none">- I think that it is preferable if a photo of the case is included within the report.- The author used many keywords as I think.	
Optional/General comments	The overall report is good and I recommend it for publication.	

Review Form 1.6

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
