Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	<p>Methodology can be given under which all the scales, tests and intervention can be described in detail.</p> <p>With title Results, Under results sections, Regime periods of phase 1 and phase 2 can be combined in one table with goal on right side and exercise of pre, post 1 post 2 in columns on left hand side. Because the goals are almost similar.</p> <p>And all the scales (NPRS, ROM and others if any) should be described in quantitative form to show the efficacy of the physiotherapy exercises. Tables can be prepared for pre, post 1 post 2 and follow up scores of all scales.</p> <p>Prepare quantitative tables of follow up of pre, post phase 1 and post phase 2 of NPRS scale and then describe the significant results in details. Prepare table of ADL by putting feeding, dressing etc. on right hand side rows and scores of ADL's of pre, post 1 and post 2 on left hand side columns of scale used in case study.</p> <p>If any questionnaire used for urine continence exercise then describe the results in tabular form or if not used, then write the verbatim response of the subject from preoperative phase to post operative phase in paragraph, then describe it.</p> <p>The ergonomic advice can be described in a paragraph in the last of the results.</p> <p>Please compare the results with the previous done studies under discussion. In Discussion, all the exercises, scale results should be described in details while relating it to the previous conducted studies. Physiotherapy and urine incontinence exercises results, ergonomic advice should be focused more while writing the discussion. It should be elaborated in detail.</p>	
<u>Minor</u> REVISION comments	<p>The minor revision are under the Abstract part and introduction</p> <p>Write the clinical findings, timeline, Diagnostic assessment in coherence.</p>	
<u>Optional/General</u> comments	<p>After conclusion, Under recommendation heading, home exercise program, ergonomic advice, rehabilitation program, and Physiotherapy intervention can be recommended in post hysterectomy cases with urinary incontinence.</p>
