Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Case Report:</p> <ul style="list-style-type: none"> - What is OPD? - Why did you decide for laparotomy? - When did you realize the pulmonary metastasis? - Why did you perform a radical hysterectomy? - What does radical hysterectomy exactly mean in this case? - What about the paraaortic lymph nodes? - How do you explain the full remission and the metastasis at the same time? - What about p53, L1CAM, MSI or MMR, POLe? <p>Discussion:</p> <ul style="list-style-type: none"> - Maybe you could also discuss other complications during chemotherapy such as bowel perforation, fistula, etc. and show the alternatives to chemotherapy if there are any. - Please discuss the place for additional treatment options with checkpoint-inhibitor and VGEF-inhibitor. <p>Conclusion:</p> <ul style="list-style-type: none"> - The conclusion is too long. This is it: <p>We should be on the alert for any pulmonary issues following chemotherapy and fast shrinking of pulmonary tumours. Spontaneous pneumothorax is an uncommon but potentially fatal situation that can strike at any time.</p> <p>References:</p> <ul style="list-style-type: none"> - You could also cite the following articles: <p>Chen JR, Yang YC. Spontaneous pneumothorax after intensive chemotherapy in endometrial cancer: a rare complication. Taiwan J Obstet Gynecol. 2014 Jun;53(2):245-7. doi: 10.1016/j.tjog.2013.09.002. PMID: 25017278.</p> <p>Duvalyan A, Tran K, Lee C, Chopra S, Hu J. Pneumothorax presentation in endometrial sarcoma patients receiving chemotherapy: A case series. Rare Tumors. 2020 Nov 29;12:2036361320972865. doi: 10.1177/2036361320972865. PMID: 34394884; PMCID: PMC8351025.</p>	
Minor REVISION comments		

Review Form 1.6

Optional/General comments	The case is interesting and it is worth to be published as a rare complication during chemotherapy. However, the focus should be exactly on this rare condition. The case should be presented with better precision. The decision making process is not clear. The above mentioned points should be considered and discussed.
