PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>There seems to be a lack of continuity in the entire article. The sub headings are abrupt and do not seem to be in context of what has been written before.</p> <p>Most importantly, this review should have been about different grafting procedures, out of which the bone ring technique was to be highlighted; as the title and abstract suggest. Instead, there seems to be more information about density of different regions of the bone and what happens post edentulism.</p> <p>The review article should have been more streamlined about dental implants, complications faced if resorbed regions, different procedure to augment and then the BRT could have been spoken about in details. Please provide information about the technique of choice, there is no mention of it.</p>	
Minor REVISION comments	Grammatical mistakes Reference format is not correct	
Optional/General comments	Please rewrite the article with importance to the grafting techniques, the procedures used and review prior publications. Then move into your choice of procedure.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
