PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The article in general is very interesting. I could revise the order of how they write it, to carry a common thread, since sometimes it seems that ideas of pathophysiology, diagnosis and treatment are mixed. I see that there are only 6 bibliographies out of 29 that are recent, I don't know if it is possible to further update the revised bibliographies. There are some parts of the text that seem to be from the experience of the person who writes it, since it is not supported by bibliography, I don't know if everything should have bibliographic support. If the therapies they suggest can enliven them with images, it would be much better for the reader.</p>	
Minor REVISION comments		
Optional/General comments	The article is important, you can give a review a little more organized and coherent.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
