

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_79511
Title of the Manuscript:	Cholinesterase Inhibitors used for the management of Alzheimer's disease: A review
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Many references are quite old. It is needed to include as the latest studies as possible. Research in medicine is very current. Hence, it is important to apply the newest knowledge available. Moreover, it is much more significant for the review paper. Another issue is that no discussion is included in the manuscript. It is a quite crucial part of each scientific paper. This should bring more comparison of the discussed references. Also, the concluding remarks are very general. But, it comes from the fact that the conclusion is not supported by the previous sections as it should be.	
Minor REVISION comments	Because all of the headings are formatted in the same way, it is unusual to number a handful of them. It is little bit misleading.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
