PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>The paper discusses the issue of single umbilical artery and its possible correlation with genetic anomalies and congenital malformations. In fact, there are a lot of reports in the literature that associate this finding with congenital birth defects. The paper should be more organized. There is no clear indication about the aim of the study, material and methods, results and practical conclusions. There is a lot of redundant information in the paper. The overall impression is an enumeration of the possible birth defects associated with single uterine artery. First recommendation to the authors is to better organize the data in a more concise and scientific manner.</p>	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
