

## Review Form 1.6

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_JPRI_79571
Title of the Manuscript:	Antagonistic Activity of Bacteriocins produced by Lactobacillus isolates against Multidrug Resistant Pathogens
Type of the Article	

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ul style="list-style-type: none"><li>discussion is minimal. It is recommended to the authors to add to the research discussion, including the relevant previous research results and the mechanism or phenomenon of the research results obtained</li><li>To ensure that the isolated isolate is Lactobacillus, it is recommended that biochemical and morphological characterizations be included</li><li>how do you make sure that the bacteria isolated from this soil is S. aureus and Pseudomonas? sometimes using selective media is not enough</li></ul>	
<b>Minor</b> REVISION comments	<ul style="list-style-type: none"><li>To minimize the effect of hydrogen peroxide on antibacterial activity, it is recommended to add catalase. is catalase used in this procedure?</li></ul>	
<b>Optional/General</b> comments	The important point in this study is to determine that the bacteria being tested is lactobacillus. Using selective media to determine the genus Lactobacillus sometimes is not enough, biochemical and morphological characterization or even molecular identification is required	

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

### **Reviewer Details:**
