PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This is an interesting topic. The study focuses on the pathogenic mechanisms and assessment of risk factors involved in diabetes after liver transplantation. There are many similar studies in the literature, so the degree of originality is not very high.</p> <p>https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4445111/ https://www.dovepress.com/an-analysis-of-the-risk-factors-for-new-onset-diabetes-mellitus-after-peer-reviewed-fulltext-article-IJGM</p> <p>It is difficult to follow the article because there are mistakes and not only spelling. I recommend making graphs, adding tables, or even diagrams that raise the level of the article. In this format I do not recommend for publication. If the authors restructure and make it comprehensive, it might be of interest.</p>
