

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_79807
Title of the Manuscript:	A Review On The Incidence Of Conjunctivits Seen In Covid-19 Disease
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The present paper needs a complete overhaul before it can be submitted again for evaluation. It is a subject of medical importance due to the worldwide situation of COVID and the various clinical forms presented by the SARS-CoV-2 infection. However, the article is poorly structured, the figures and table are not called out in the text, there is no font, and many references are missing. There is no sequence in the text. Besides, it is a review article, that is, there are many other journals that need to be searched as sources in databases such as PUBMED and etc, and not only the Indian Journal of Ophthalmology. Specific articles on conjunctivitis caused by SARS-CoV-2 should be included in order to be published.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
